

Biological Psychiatry: Global Open Science

Volume 3, Number 1, January 2023

IN THIS ISSUE - JANUARY

- 1** A brief summary of the articles in this issue of *Biological Psychiatry: Global Open Science*.

COMMENTARIES

- 3** **Limitations and Value of Animal Models of Relevance to the Schizophrenia Prodrome**
Alison R. Yung
» See corresponding article on page 22
- 6** **Subcortical Origin of Salience Processing Deficits in Schizophrenia**
Lena Palaniyappan
» See corresponding article on page 33
- 8** **The Role of Dysfunctional Reward Processing in Psychotic Disorders**
Stefan Kaiser
» See corresponding article on page 47

REVIEWS

- 10** **Neurite Orientation Dispersion and Density Imaging in Psychiatric Disorders: A Systematic Literature Review and a Technical Note**
Nina Vanessa Kraguljac, Michele Guerreri, Molly Jordan Strickland, and Hui Zhang
- 22** **Animal Models of Relevance to the Schizophrenia Prodrome**
Alice Petty, Oliver Howes, and Darryl Eyles
» See commentary on page 3

- 33** **Neural Circuitry of Salience and Reward Processing in Psychosis**

James P. Kesby, Graham K. Murray, and Franziska Knolle

» See commentary on page 6

ARCHIVAL REPORTS

- 47** **Reward Processing as an Indicator of Vulnerability or Compensatory Resilience in Psychoses? Results From a Twin Study**
Mette Ødegaard Nielsen, Egill Rostrup, Rikke Hilker, Christian Legind, Simon Anhøj, Trevor William Robbins, Barbara J. Sahakian, Birgitte Fagerlund, and Birte Glenthøj
» See commentary on page 8
- 56** **Risk of Death in Individuals Hospitalized for COVID-19 With and Without Psychiatric Disorders: An Observational Multicenter Study in France**
Nicolas Hoertel, Marina Sánchez-Rico, Pedro de la Muela, Miriam Abellán, Carlos Blanco, Marion Leboyer, Céline Cougoule, Erich Gulbins, Johannes Kornhuber, Alexander Carpinteiro, Katrin Anne Becker, Raphaël Vernet, Nathanaël Beeker, Antoine Neuraz, Jesús M. Alvarado, Juan José Herrera-Morueco, Guillaume Airagnes, Cédric Lemogne, and Frédéric Limosin, on behalf of the AP-HP/ Université de Paris/Inserm COVID-19 Research Collaboration and the AP-HP COVID CDR Initiative, "Entrepôt de Données de Santé," AP-HP Consortium

- 68 Dose-Dependent Dissociation of Pro-cognitive Effects of Donepezil on Attention and Cognitive Flexibility in Rhesus Monkeys**
Seyed A. Hassani, Sofia Lendor, Adam Neumann, Kanchan Sinha Roy, Kianoush Banaie Boroujeni, Kari L. Hoffman, Janusz Pawliszyn, and Thilo Womelsdorf
- 78 Hippocampal α 5-GABA_A Receptors Modulate Dopamine Neuron Activity in the Rat Ventral Tegmental Area**
Stephanie M. Perez, Alexandra M. McCoy, Thomas D. Prevot, Md Yeunus Mian, Flavia R. Carreno, Alan Frazer, James M. Cook, Etienne Sibille, and Daniel J. Lodge
- 87 Antidepressant Response and Stress Resilience Are Promoted by CART Peptides in GABAergic Neurons of the Anterior Cingulate Cortex**
Yuki Funayama, Haiyan Li, Erina Ishimori, Ayako Kawatake-Kuno, Hiromichi Inaba, Hirotaka Yamagata, Tomoe Seki, Shin Nakagawa, Yoshifumi Watanabe, Toshiya Murai, Naoya Oishi, and Shusaku Uchida
- 99 Single-Cell Transcriptional Changes in Hypothalamic Corticotropin-Releasing Factor–Expressing Neurons After Early-Life Adversity Inform Enduring Alterations in Vulnerabilities to Stress**
Annabel K. Short, Christina W. Thai, Yuncai Chen, Noriko Kamei, Aidan L. Pham, Matthew T. Birnie, Jessica L. Bolton, Ali Mortazavi, and Tallie Z. Baram
- 110 Assessing the Evidence for Causal Associations Between Body Mass Index, C-Reactive Protein, Depression, and Reported Trauma Using Mendelian Randomization**
Alish B. Palmos, Christopher Hübel, Kai Xiang Lim, Avina K. Hunjan, Jonathan R.I. Coleman, and Gerome Breen
- 119 Self-referential Processing in Remitted Depression: An Event-Related Potential Study**
Grace O. Allison, Rahil A. Kamath, Vivian Carrillo, Kira L. Alqueza, David Pagliaccio, George M. Slavich, Stewart A. Shankman, and Randy P. Auerbach
- 130 Trait Mindfulness Is Associated With Less Amyloid, Tau, and Cognitive Decline in Individuals at Risk for Alzheimer’s Disease**
Cherie Strikwerda-Brown, Hazal Ozlen, Alexa Pichet Binette, Marianne Chapleau, Natalie L. Marchant, John C.S. Breitner, and Sylvia Villeneuve, for the PREVENT-AD Research Group
- 139 Decoupling Sleep and Brain Size in Childhood: An Investigation of Genetic Covariation in the Adolescent Brain Cognitive Development Study**
Leanna M. Hernandez, Minsoo Kim, Cristian Hernandez, Wesley Thompson, Chun Chieh Fan, Adriana Galván, Mirella Dapretto, Susan Y. Bookheimer, Andrew Fuligni, and Michael J. Gandal

149 A Prospective Evaluation of Infant Cerebellar-Cerebral Functional Connectivity in Relation to Behavioral Development in Autism Spectrum Disorder

Zoë W. Hawks, Alexandre Todorov, Natasha Marrus, Tomoyuki Nishino, Muhamed Talovic, Mary Beth Nebel, Jessica B. Girault, Savannah Davis, Scott Marek, Benjamin A. Seitzman, Adam T. Eggebrecht, Jed Elison, Stephen Dager, Matthew W. Mosconi, Lawrence Tychsen, Abraham Z. Snyder, Kelly Botteron, Annette Estes, Alan Evans, Guido Gerig, Heather C. Hazlett,

Robert C. McKinstry, Juhi Pandey, Robert T. Schultz, Martin Styner, Jason J. Wolff, Lonnie Zwaigenbaum, Lori Markson, Steven E. Petersen, John N. Constantino, Desirée A. White, Joseph Piven, and John R. Pruett Jr., for the IBIS Network

ERRATUM

162 Erratum to: Low-Dose Augmentation With Buprenorphine for Treatment-Resistant Depression: A Multisite Randomized Controlled Trial With Multimodal Assessment of Target Engagement

Funayama *et al.* (in this issue, pages 87–98) found that CART peptides in GABAergic neurons of the anterior cingulate cortex drive antidepressant response and stress resilience in mice. Their results suggest fundamental differences in the molecular signatures between responders and nonresponders and implicate specific molecules in the development of antidepressant drugs. See Figure 4 for details on the image featured on the cover.
